DETAILED ACTION

1. Applicant's arguments, see appeal brief, filed February 23, 2007, with respect to the rejection(s) of claim(s) 1-30 under appeal have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Robertson et al., US 6,496,740 B1.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 11, and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Robertson et al., US 6,496,740 B1.

4. As to claims 1, 11, and 21, Robertson discloses a *method, computer program product, and system for facilitating inter-DSP communication comprising reading a data structure ("data transfer request", see claim 1, col. 15 lines 17-20) associated with a block of local memory in a first DSP core in a complex comprising a plurality of DSP cores, the data structure comprises first source address indicating where data is stored in said local memory of the first DSP, further comprises indication of the size of a block of memory, and further comprises first destination address indicating where data is to be stored in a local memory of a second DSP core* (see Abstract, col. 2 lines 49-63, col. 6 lines 10-20 and 41-47, col. 7 lines 57-63, col. 8 lines 21-33, which clarify that the

system may be used for transfers to and from DSP local memory, between DSPs, and the transfers are designated by source address, size, and destination address), and *initiating a transfer of moving data said size of said block of memory from the source address to the destination address* (previously cited sections).

Allowable Subject Matter

5. Claims 2-10, 12-20, and 22-30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
